BEGINNER'S BLUEPRINT & STEP-BY-STEP GUIDE

Building Your Fantasy Stock League App

How we will turn your idea into a working web application together, piece by piece.

The Beginner Advantage

100%

Guided collaboration where AI writes the code while you make the creative and structural choices.

Core Application Architecture

User Dashboard

Personal portfolio view and current stock roster.

Draft Room

Selecting companies within budget limits.

Live Leaderboard

Ranking friends based on percentage returns.

Our 4-Step Journey Together

STEP 1

Visual Layout

Translate your wireframe into a clean web screen.

STEP 2

Stock Data

Integrate simulated or live market pricing tickers.

STEP 3

Draft Rules

Build the logic for picking companies and scoring.

STEP 4

Polish & Test

Refine user experience and test it out together.

Ready to start Step 1?

Share your wireframe details or layout notes whenever you are ready,
and we will write the first piece of code.
