Low-Fidelity Wireframe Description for Fantasy Stock League (FSL)

Screen Name: Home Dashboard

Purpose: Central hub for users to access league activities and key actions.

Key UI Elements: - **Top Header:** User profile picture, username, notification icon. - **League Cards:** For each league joined (League Name, W-L Record, Current Matchup Status). - **Buttons:** "Join a League," "Create a League" (center-bottom). - **Bottom Navigation Bar:** Home, Portfolio, Versus, Stocks, News.

User Interactions: - Tap league card to access League Details. - Tap "Join/Create League" buttons to navigate to respective screens.

Navigation Paths: - League Card > League Detail screen. - "Join a League" > Join League form. - "Create a League" > Create League form.

Data Display: - Current leagues, user W-L records.

Empty States: - "You haven't joined any leagues yet!" with CTA to "Create a League".

Error States: - "Failed to load leagues. Please retry."

System Feedback: - Toast on successful league join/creation.

Responsiveness: - Cards stack vertically on mobile.

Screen Name: Create League

Purpose: Allows users to create a new FSL league.

Key UI Elements: - **Input Fields:** League Name, Invitation Code (auto-generated). - **Radio Buttons:** 10 or 20 participants. - **Draft Settings Button:** Opens draft preferences. - **Submit Button:** Finalizes league creation.

User Interactions: - Type name, choose size, configure draft, tap Submit.

Navigation Paths: - Submit > League Details screen.

Data Display: - Real-time validation for name/code.

Empty States: - Placeholder fields.

Error States: - "League name must be unique." or "Draft date not selected."

System Feedback: - Confirmation modal and toast: "League Created Successfully."

Responsiveness: - Vertical layout, auto-scroll on smaller screens.

Screen Name: Invite Players

Purpose: Invite friends to join the league.

Key UI Elements: - **Header:** League Name, Invite Players. - **Methods:** Email field + Send button, QR Code display, Copy Invite Code. - **Text Block:** Instructional message.

User Interactions: - Tap Copy Code, Enter Email, Tap Send. - Open phone scanner for QR.

Navigation Paths: - Back > League Details.

Data Display: - League code, invite email input history (optional).

Empty States: - "No invitations sent yet."

Error States: - "Failed to send invite. Try again."

System Feedback: - "Invitation sent" toast or dialog.

Privacy & Control: - Only commissioners can invite. - Settings: "Invite only" vs "Open to join".

Tracking Invitations: - Optional: Display list of sent invites with status.

Screen Name: Draft Board

Purpose: Select companies in a multi-round league draft.

Key UI Elements: - **Grid Layout:** Draft slots by user. - **User Avatars:** Top row. - **Company Cards:** Logos, names, sectors. - **Filters:** Sector filter, search bar.

User Interactions: - Tap company to draft (if on the clock). - Hover/click for stats (desktop).

Navigation Paths: - Back to League or Portfolio.

Data Display: - Real-time updates on draft picks.

Empty States: - Blank grid slots.

Error States: - "Pick failed. Please retry."

System Feedback: - Highlighted picks, countdown timer.

Responsiveness: - Scrollable grid, condensed view on mobile.

Screen Name: My Portfolio

Purpose: Manage active team lineup.

Key UI Elements: - **Header:** Team Name, W-L record. - **Lineup:** Company Cards per sector slot. - **Reserve Bench:** Separate block below.

User Interactions: - Drag/drop to reorder (desktop), tap to swap (mobile).

Navigation Paths: - Tap company > Stock Details. - Edit icon > Add/Drop screen.

Data Display: - Company name, ticker, last price, change %.

Empty States: - "No company selected for this slot."

Error States: - "Failed to update lineup."

System Feedback: - "Lineup saved" toast.

Screen Name: Versus / Matchup

Purpose: View weekly head-to-head competition.

Key UI Elements: - **Scoreboard:** Your score vs opponent. - **Company Tiles:** Comparison view by sector.

User Interactions: - Scroll tiles, tap for details.

Navigation Paths: - Tap opponent name > Player Profile.

Data Display: - Live and final stats by company.

Empty States: - "Matchup not started."

Error States: - "Matchup data unavailable."

System Feedback: - Final scores locked Friday.

Screen Name: Add/Drop Companies

Purpose: Manage roster and reserve selections.

Key UI Elements: - **Filters:** By sector, performance, etc. - **Company Cards:** Stats, Add/Delete buttons. - **Top Companies Trends Panel.**

User Interactions: - Tap Add/Delete. - Filter/search.

Navigation Paths: - Tap company > Details.

Data Display: - Price, volume, performance.

Empty States: - "No companies meet criteria."

Error States: - "Action failed."

System Feedback: - Toast: "Company added to team."

Screen Name: Stock News

Purpose: Provide financial/news context.

Key UI Elements: - **News Feed:** Cards with title, image, preview. - **Market Selector:** Choose stock exchange/language. - **Trending Moves Panel:** League-wide add/drops.

User Interactions: - Tap news to read full article.

Data Display: - News via API, league stats.

Empty States: - "No news found."

Error States: - "Failed to load."

System Feedback: - None required.

Screen Name: Token Betting

Purpose: Enable betting using tokens.

Key UI Elements: - **Token Balance:** Top right. - **Categories:** Tabs for sector betting (e.g., Crypto, Tech). - **Bet Slip:** Select stock, prediction (up/down), amount. - **Public Board:** View other open bets.

User Interactions: - Select prediction, input tokens, confirm. - Join open bets.

Navigation Paths: - Bet slip > Confirmation screen.

Data Display: - Stock data, odds, history.

Empty States: - "No bets open. Start one!"

Error States: - "Insufficient tokens."

System Feedback: - Toast: "Bet placed!"

Responsiveness: - Tabs collapse into dropdown.

Screen Name: Token Store / History

Purpose: Buy tokens and view transaction history.

Key UI Elements: - **Token Balance Display.** - **Buy Packages Grid:** (10/50/100 tokens). - **Purchase Button:** Integrated with payment. - **History Table:** Date, Action, Amount.

User Interactions: - Select package, proceed to payment.

Navigation Paths: - Back > Profile or Betting.

Data Display: - Real-time balance, transaction log.

Empty States: - "No transactions yet."

Error States: - "Payment failed."

System Feedback: - "Tokens purchased!"

Flow Analysis and Improvements

Friction Points: - **Invitation via email only** limits reach. Recommend adding social media/native share sheet integration. - **No draft notifications/reminders** may result in missed picks. Add optional alerts. - **Portfolio editing might confuse users** with large categories. Use sector icons/colors to ease navigation.

Enhancements: - **Gamify the dashboard** with a weekly "Hot Stock" badge or weekly reward for best performance. - **Add Draft Queue system** for autopick fallback. - **Include in-app tutorial** for onboarding new users beyond the welcome screens.

Missing Features: - **Achievements or trophies.** Add a "Hall of Fame" page for bragging rights. - **Dark Mode toggle.** Important for accessibility and user preference. - **Live Chat or League Chat.** Crucial for building community.

Mobile UX Recommendations: - Use sticky headers for important action buttons (e.g., "Submit Lineup"). - Ensure tap targets are accessible (minimum 48x48dp). - Auto-save progress in drafts, forms.

This design is ready for developer hand-off and can be iterated in a design tool (e.g., Figma) or translated to HTML/SVG/React code for implementation.
